

MD-155 Wired rolling magnetic contact manual

1, Introduction

MD-155 is a Mini wired rolling shutter magnetic switch detector. With novelty and streamline design, it fits well the surroundings and can be decorative at residence. This detector is the separating trigger model. When the distance between the emitter and magnet is about 5cm, the emitter will send out the alarm signal to control panel in order To prevent the intruder entering into the room from the door or window.

Appearance
